Motivation Letter

My name is Khalil Tamersit, I am writing to express my interest in applying for the Secretary position at IEE Algeria Section.

I received the B.Sc. degree in medical instrumentation, the M.Sc. degree in bio-medical electronics, and the Ph.D. degree in medical electronics from Batna University. I am currently an Associate Professor with the Department of Electronics and Telecommunications, University 8 May 1945 of Guelma. I have published as first and corresponding author more than 60 papers in reputed journals and international conferences. My research interests include the nanoelectronics, bioelectronics, and nanotechnology. I have obtained several award such as Certificate of Merit from the World Congress on Engineering, U.K., in 2014, the Best Paper Award in the 44th IEEE International Semiconductor Conference, 2021, and the appearance in the list of Top-Scientists in the World for a single year impact, 2021, by Elsevier, Stanford University. I am an active member in several reputed scientific associations and academies. I have reviewed more than 120 papers for leading journals (verified by Publons of Web of Science).

Considering my modest proficiency that I acquired during my early career, I feel that I can give new impulses to IEEE Algeria Section by occupying, as a start, the Secretary Position. In this context, I shortlist some important points, which are parts of my program for the eventual future term:

- 1) Since the number of IEEE Members is the main asset in boosting the different activities in the Section (IEEE conferences, IEEE brunch, IEEE affinity group, IEEE Young Professionals Affinity Group...etc.); thus, the increase of IEEE members is an important task, and the success of doing that will certainly serve different future strategies and programs.

2) Encouraging the IEEE conferences organization while integrating in them some IEEE activities for the promotion (i.e. attracting new memberships, IEEE networking, establishing new groups and brunches, etc.)

3) Collaborating with IEEE Africa Council to open new promising horizons.

4) Establishing a new strategy that will allow all members to contribute efficiently in the development of the IEEE Algeria Section.

I look forward to be an active part in the IEEE Algeria section. Please, receive my sincere greetings

Sincerely yours,

Algiers, 29/12/2021

Dr. Khalil Tamersit
